CAREER OBJECTIVE

Recent software engineering Bootcamp graduate who has worked to develop several full-stack web applications to both implement and demonstrate my ability with web development technologies and tools. I take initiative in terms of refining processes and asking questions and am eager to contribute my work and skills to an innovative workplace.

SKILLS

Languages: Javascript, Python, SQL, HTML, CSS

Frameworks/Tools: React, Redux, Express, Flask, Sequelize, SQLAlchemy, PostgreSQL, Docker

Key Skills: Pair Programming, Test-Driven Development (TDD), Object-Oriented Programming (OOP), Scrum Methodologies, Restful APIs

PROJECTS

Tweeter (React / Redux / Flask / SQLAlchemy / Postgres / Heroku)

live | github

Clone of Twitter

- Produced an efficient follows join table that shares the same user model where users can follow/unfollow effectively.
- Designed a near pixel-perfect clone, for friendly and familiar UI and UX.

Yelp Squad (React / Redux / Express / Sequelize / Postgres / Heroku)

live | github

Loose clone of Yelp.

- Developed dynamic star-rating feature that changes when hovered. Upon submit, the average rating and number of reviews for a "squad" updates dynamically.
- Utilized state management of Redux by flattening incoming data for more efficient implementation.

Slick (React / Redux / Flask / SQLAlchemy / Postgres / Heroku / SocketIO)

live | github

Clone of Slack (Group Project).

- Built a filtered user search that can integrate Create of a direct message, or if one already exists with chosen user, redirect to the existing page.
- Collaborated for utilizing SocketIO to implement a live-chat feature that Creates and Deletes in real-time.

EXPERIENCE

Assistant Sushi Chef - *Sushic LLC*

Jan 2021 - Dec 2021

- Actively prepped, prepared, and served orders continuously.
- Advised and assisted the switch to digital data entry for tasks such as routine temperature checks, storing data for menu items, and receiving updates on changes to menu or other policies.
- Adapted and adjusted quickly even with no previous experience. Resulted in approximately 50% increase in productivity.

Fulfillment Associate - *Target*

May 2020 - Dec 2020

- Fulfilled approximately 13 order requests per shift that on average contain 28 items per order, which is expected to be prepared within a given timeframe.
- Provided diligent customer service while maintaining a high productivity score and fulfilling orders.
- Productivity never dropped below 85% even while the inventory was depleting and fulfillment orders were rapidly increasing due to the state of the country during the Coronavirus pandemic.

Student Volunteer - *S.I.T.E.S (Social Involvement Through Education & Service)*

Sept 2016 - April 2017

- Collected, sorted, and processed grocery orders for families in need at the local food bank, Oxcart Pantry.
- Assisted in answering student's questions and aiding in lesson plans as a Teacher's Aid for 3rd graders at Spruce Elementary School.

EDUCATION

App Academy

Spring 2022

- Full-stack web development bootcamp prioritizing software engineering best practices
- Covered topics such as data structures and algorithms, object-oriented programming (OOP), test-driven development (TDD), etc
